PROFESSIONAL SUMMARY	
Data Analytics fresher with hands-on experience in Python, Power BI, SQL, and Machine Learning. Completed internship at Vitalsym Healthcare, built 10+ dashboards and analyzed 10,000+ patient records. Awarded Best Project 2026 at MIT-ADT University for a healthcare ML classification system. AWS certified with strong foundation in EDA, statistical modeling, and data visualization. Seeking an entry-level Data Analyst role to drive data-driven decisions.	
EDUCATION	
MIT-ADT University <i>B.Tech – Information Technology (Data Analytics); CGPA: 7.95</i>	Pune, India <i>June 2022 – June 2026</i>
PGPL College, Latur <i>Diploma – Information Technology; Score: 81%</i>	Latur, India <i>June 2019 – August 2021</i>
SKILLS SUMMARY	
Languages: Python, SQL, C++, Java (basics) Frameworks: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn Tools: Power BI, Excel, Tableau, MySQL, SQLite Platforms: PyCharm, Jupyter Notebook, VS Code, Git, GitHub Cloud : AWS (EC2, S3, RDS, IAM, VPC) AI / ML: Machine Learning, Deep Learning, Predictive Modeling, Model Evaluation & Tuning, Feature Engineering Generative AI: Prompt Engineering, LLM Applications Agentic AI: Agentic Workflows, Automation and workflow platform NLP : SpaCy, NLTK, Text Preprocessing, Tokenization, Text Classification (<i>new</i>) Statistical Skills: Data Collection & Preparation, Descriptive Statistics (Mean, Median, Mode), Probability Fundamentals, Random Variable Distributions, Hypothesis Testing (Basic), Regression Analysis (Basic), Exploratory Data Analysis (EDA), Statistical Data Visualization, Data Cleaning & Validation Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Effective Communication, Team Collaboration	
WORK EXPERIENCE	
DATA ANALYST INTERN VITALSYM HEALTHCARE PVT. LTD 	Pune March 2026 - May 2026
- Performed exploratory data analysis (EDA) on patient health datasets using Python (Pandas, NumPy) to identify clinical patterns and risk indicators - Developed Power BI dashboards and 10+ reports presenting model performance and clinical insights to healthcare stakeholders - Cleaned and pre-processed 10,000+ healthcare records - handled missing values, outliers, and class imbalance via feature engineering, improving data quality by 33% - Developed 10+ stakeholder-ready Power BI dashboards and reports communicating model performance, risk distributions, and data-driven recommendations to clinical and management teams. - Collaborated with clinical and management teams to gather requirements and align data solutions with healthcare business objectives	
PROJECTS	
Diabetic Detection - Predictive Classification System 	2025 – 2026
- Achieved high Recall accuracy in predicting patient diabetes risk by developing and deploying a multi-model ML classification system on 500+ patient diagnostic records. - Managed data integrity by handling missing values, encoding categorical variables, and resolving class imbalance via feature engineering, improving quality by 33%. - Trained and evaluated multiple Scikit-learn classification models; applied cross-validation techniques to assess model performance and improve F1-score by 12%. - Identified key clinical risk factors influencing diabetes outcomes through EDA and statistical analysis - awarded Best Project Award (2026), MIT-ADT University.	
Geo-Tagging Plantation Monitoring System 	2024 – 2025
- Developed a geospatial crop monitoring system integrating GPS data, QGIS, and Google Earth Engine to track health across 50+ hectares achieved 85% forecast accuracy using ML and statistical models. - Applied anomaly detection algorithms to identify pest infestation and drought stress correlated environmental statistical patterns with crop health outcomes. - Integrated IoT sensor data (soil moisture, temperature) with Power BI geospatial dashboards, reducing manual inspection time by 30% and enabling data-driven irrigation decisions.	
CERTIFICATIONS & ACHIEVEMENTS	
Best Project Award – Diabetic Detection MIT-ADT University	2026
Awarded for building a healthcare ML classification system with measurable real-world impact on patient risk assessment and clinical decision-making.	
AWS Academy Graduate – Cloud Foundations 	2025
Mastered AWS core services (EC2, S3, RDS, IAM, VPC) for scalable cloud infrastructure and data solutions.	
Advanced Course in Data Science Technical Guftgu 	2024
Mastered end-to-end data science workflows: EDA, statistical modeling, machine learning pipelines, and data visualization.	
Test Case Generation with Generative AI MIT-ADT University 	Nov 2024
Applied generative AI and prompt engineering to automate test case generation for software quality assurance processes.	
National Level Project Competition & Exhibition – Projit 	2024
Represented MIT-ADT University at national level; presented geospatial data analytics project to industry and academic judges.
